

BABIN SAUD

Quality Assurance Engineer | PM/QA Hybrid

saudbabin@gmail.com | +977 9815607433 | Kathmandu, Nepal | LinkedIn | [Portfolio](#)

PROFILE

Results-driven QA Engineer with 4 years of experience transitioning into a PM/QA hybrid role. Proven record of owning product quality end-to-end — from requirements to post-release — across web, mobile (Android), and TV platforms in Agile environments. Combines deep QA expertise (manual, API, security, performance, accessibility, automation) with product ownership skills including sprint planning, stakeholder collaboration, and process improvements that reduced production defects by 50% and release cycle time by 40%. Experienced in mentoring junior QA members and leading projects from inception to production.

PROFESSIONAL EXPERIENCE

Innovate Tech Pvt Ltd

2023 – Present

Quality Assurance Engineer | Kathmandu, Nepal

- Served as QA Lead for [Kung Fu Quiz](#) (sifu.kungfuquiz.com), owning the full product lifecycle from inception to production — including requirements discussions, sprint planning, test strategy, automation support, and post-release analysis. Achieved 100% on-time delivery by proactively flagging risks during sprint planning, ensuring QA was never a release bottleneck, and coordinating closely with developers and stakeholders to resolve ambiguities early.
- Reduced production defects by 50% by introducing structured root cause analysis, regression checklists, and pre-release QA sign-off gates. Improved release cycle efficiency by 40% by standardizing test case templates, applying risk-based prioritization, and tightening the feedback loop between QA, development, and product teams.
- Designed end-to-end QA strategies covering unit, regression, end-to-end, black-box, API, security, and accessibility testing, achieving 95% test coverage and enabling confident, faster product releases.
- Conducted API testing (Postman/Swagger) and security testing (BurpSuite), identifying and resolving critical vulnerabilities before each release, directly reducing post-release incidents.
- Led and mentored 5+ junior QA members across 10+ modules of [MySecondTeacher](#) (mysecondteacher.com) and Kung Fu Quiz, uplifting team capability and improving testing consistency.
- Gathered and synthesized feedback from CSD and support teams to refine requirements and QA focus areas, acting as a bridge between users, product, and engineering.
- Managed major [MST](#) feature releases on web and mobile Android, including app upgrades, release notes, and cross-functional coordination with developers, marketing, and project teams.
- Tested and validated [MST](#) TV features, integrating mobile functionality and ensuring cross-platform performance stability.
- Supported automation efforts using Playwright and Selenium, reducing manual testing effort and improving team efficiency.
- Facilitated retrospective meetings and root cause analysis sessions, identifying systemic issues and implementing improvements that reduced recurring defects.

Sursa Technology

Mar 2022 – Jan 2023

Quality Assurance Engineer | Kathmandu, Nepal

- Executed manual, exploratory, security, performance, and accessibility testing for web and mobile applications.
- Designed and maintained detailed test cases and scenarios, improving QA documentation completeness by 30%.
- Participated in Agile ceremonies and supported QA process improvements that enhanced test quality and release reliability.

TECHNICAL SKILLS

- **Tools:** Azure Test Plans, Postman, Swagger, JMeter, Playwright, Selenium, BurpSuite, WAVE, NVDA, GitLab
- **Testing Types:** Manual, Exploratory, API, Performance, Security, Unit, Regression, End-to-End, Black-Box, Accessibility
- **Automation & Scripting:** Java, Selenium, Playwright
- **Product & Project:** Sprint Planning, Requirements Gathering, Risk Management, Stakeholder Collaboration, Release Coordination
- **Methodologies:** Agile, Scrum
- **Soft Skills:** Leadership, Communication, Mentorship, Problem Solving, Cross-functional Collaboration

PROJECTS

Kung Fu Quiz — QA Lead – Inception to Production (sifu.kungfuquiz.com)

- Owned the QA lifecycle end-to-end: requirements discussions, sprint planning, test strategy, automation support, and post-release analysis.
- Coordinated across development, design, and stakeholder teams — proactively flagging risks early and managing scope to ensure 100% on-time delivery with zero critical post-release defects.
- Trained new interns on QA processes, testing practices, and documentation standards.
- Led retrospectives and root cause analysis to continuously improve QA processes and release quality.

MySecondTeacher (MST) — Learning Online Application (mysecondteacher.com)

- Owned QA for major components across web, mobile Android, and TV platforms; supervised junior QA members across 10+ modules.
- Developed and executed test cases covering functional and non-functional testing; conducted API and security testing for early defect detection.
- Managed mobile Android testing and feature rollout; validated MST TV feature integration for cross-platform performance.
- Contributed to 50% reduction in production issues through rigorous pre-release testing and structured defect management.

EDUCATION

Bachelor's Degree

2017 – 2022

The British College, Kathmandu, Nepal

Intermediate

2015 – 2017

Aishwarya Vidya Niketan, Dhangadhi, Nepal

INTERESTS

- **Quality Assurance & Automation:** Exploring new QA tools, AI in testing, and continuous process improvement.
- **Product Management:** Passionate about bridging QA and product thinking to deliver reliable, user-centric products.
- **Entrepreneurship:** Interested in startups and innovative business ventures.
